VTE recovered from " When you feel that CBS is developing a James Patterson Book in a TV series, you might be forgiven for taking that the Patterson book is adapted is a crime thriller, because the genreÂ € Patterson is perhaps better known. But the zoo is a book of Patterson of a different kind ... a science fiction thriller. It is the story of a scientist who tries to notify the world that the disturbing increase in animal attacks - covers all kinds of mammals and involving everything from lions devouring their managers to the zoo at a sharp peak in attacks by cats And dogs against their masters are part of a deadly model. It has all the distinctive signs of the Patterson brand: Fresh Action, Hilarious One-Foders, Interesting Characters and Winding Tracks, all wrapped in a beautiful science fiction story. In fact, it's perfect for some summer popcorn-TV watching, and that's why. It is original that we guarantee that it has not seen anything like the zoo on TV in recent years "perhaps ever. The concept is exciting: the animals are organizing and launching an all-out war on humanity. Pause and think of all the Animals of the world, including your pets. Now imagine that each of them had had it for you. The real terror of that idea will be magical for television. Jackson Oz is a fantastic character, the protagonist of the zoo is Jackson Oz "Bright, funny, beautiful, completely ostracized by the scientific community at the beginning of history, because it is the only one who sees the model in the animal attacks. Jackson is absolutely hilarious, and if the producers and actor James Wolk (who played Bob Bensen on Mad Men) can take 50% of the fantastic points of the character, Oz will probably be one of your favorite TV characters in 2015. The Texture takes you with a CBS ride is making a name for its own creating the events of the thriller of great tent every year, having launched under the dome in 2013 and existing in 2014. Zoo fits perfectly, due to the funny story, exciting structure . It moves quickly and jumps forward over time at the key points, following the old regulation of Elmore Leonard about "The boring stuff. The result is a story that starts at fifth march and somehow finds sixth and seventh gears after which , making it ideal for the appointment to watch TV. In addition, Patterson and Coauthor Michael Ledwidge are masters of the cliffhanger chapter pause, which should translate into some breathten cuts for the black of the series. The visualities hit there are some action sequences Set-pitch in the zoo which, if the CBS can pull them out, will be absolutely amazing to see brought to life. An attack of hundreds of lions in the middle of the African plain, an army of animals that assemble for an assault in New York City € Â , ~ "These are the kind of images that will have people collected around the radiator of the water or the comments section per day to compare the notes. The end is a doozy without spoiler, but if you read the zoo (and we strongly advise you to do), then you know that the end is both unexpected and powerful. The solution to the question of why animals turn against the humanity is creative and fascinating, and the Jackson OZ plan arrives to stop madness is equal to equal apocalyptic parts and hopefully. Even better for the prospects of a television show, the end leaves the door open for a continuation ... and CBS is definitely hoping that people roll enough tuned people and excite this show to make a second A must-have. And do you know what? We hope too. TV has enough criminality dramas and lawyer shows. We would have some more idea fiction, starting from Zoo. There will be popcorn in your hand. Wants?
